PAVERMATE 3

THE BEST POLYMERIC SAND ON THE MARKET

SRWProducts.com • 800-752-9326

ZEROHAZE

CLEAR POLYMER TECHNOLOGY

Polymers dry clear!

ENHANCED FORMULA

Does not contain Portland,
Fly Ash or Crushed Limestone
which can cause hazing.

ZERODUST

ANTI-DUSTING

Polymeric sand is specially mixed to
bind polymers to each other and to the
sand particles which reduces fines
creating anti-dusting results.

ZERO DUST, MEANS JUST THAT

The product will not dust when opened
or applied to the project surface.

ZEROPROBLEMS

FAST ACTIVATION

Rain safe in just 10 minutes!

ADDED PROTECTION

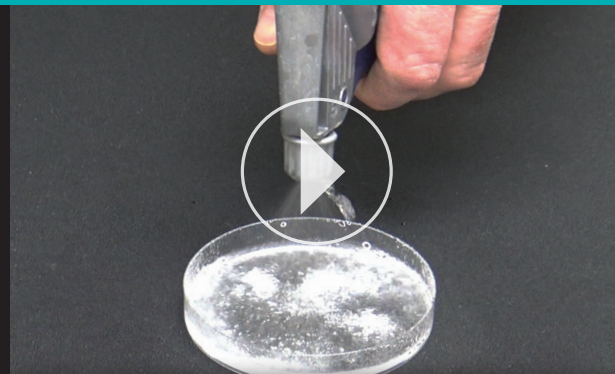

Fast activation provides protection
against unexpected rain events.

MULTIPLE APPLICATIONS

Can be used for traditional paver
installations and concrete overlays.

CLEAR POLYMER TECHNOLOGY

PRODUCT COMPARISON

FAST ACTIVATION

Multiple Applications

- ▶ Joints up to 2"
- ▶ Concrete Pavers
- ▶ Driveways
- ▶ Walkways
- ▶ Pool Decks
- ▶ Patios
- ▶ False Joints
- ▶ Concrete Overlays

Rain Safe In 10 Minutes

Pavermate Z3™ starts to react and gain strength
in 5 minutes. Fully activates throughout the whole
joint becoming rain safe in 10 minutes when
properly activated according to instructions.
It holds its form after 10 minutes, but should be
allowed to cure for the full dry time to achieve
the best long-term results.

Popular Colors

Pavermate Z3™ is available in 4 popular colors.

**Enlarged to show detail. Actual color varies by geographic location.*

Instructions Made Easy

We offer a wealth of resources
on our website including
installation instructions for
many products. Step-by-step
installation photographs
and instructions are also
available on the back of the
Pavermate Z3™ package.
