SUREBOND®
CLEANERS • SEALERS

RESTORATION & PROTECTION Done Right!

RESTORE & PROTECT YOUR INVESTMENT
IMMEDIATE APPLICATION PRODUCTS
ENVIRONMENTALLY SAFE
DUAL PURPOSE SEALERS AND SAND STABILIZERS
EASY TO APPLY

www.sek.us.com
THE UNMATCHED BREATHABILITY OF SUREBOND SEALERS MEANS...

- Surebond products can be applied immediately after paving stones are installed or concrete has cured
- Surebond products will not trap efflorescence under the sealer surface, allowing for cleaning without stripping the product
- Surebond products are effective and long-lasting, VOC compliant and environmentally friendly

Surebond Joint Stabilizing Sealers perform two tasks at once. The sealer stabilizes the sand in the joints to prevent sand loss and to help retard weed growth. The sealer also provides protection from the harsh elements and promotes easier cleaning and maintenance. Depending on the application, you can expect 3-5 years for patios and walkways from just one application and 2-3 years for driveways. **Surebond Joint Stabilizing Sealers** can also be used just as a sealer for pavers, concrete and other masonry surfaces to protect and enhance the surface without joint stabilization.

- Ideal for Patios, Walkways & Driveways
- Dual Purpose: Stabilizes Joints & Seals Pavement Surface
- Protects Surface from Harsh Elements and Every Day Wear & Tear
- Promotes Easier Cleaning & Maintenance

**Four Different Looks & Finishes Available:**

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SB-1300</td>
<td>Natural Look Matte Finish</td>
</tr>
<tr>
<td>SB-7000</td>
<td>Enhanced Look Gloss Finish</td>
</tr>
<tr>
<td>SB-7700</td>
<td>Enhanced Look Gloss Finish With Antifungal Film Protection</td>
</tr>
<tr>
<td>SB-8700</td>
<td>Wet Look Semi-Gloss Finish With Antifungal Film Protection</td>
</tr>
</tbody>
</table>

**Flood Coat Application:** Apply liberally with a sprayer and squeegee excess material into sand joints. Use properly graded joint sand for optimal performance. Sand should meet ASTM C 144 standard.

**SB-POWER SPRAYER**

- Self contained, cordless sprayer with industrial grade sprayer components and a rugged handcart
- Long term durability and dependability for both residential and commercial use
- Drastically reduced labor cost over a traditional handheld or backpack sprayer
- On Demand Pump System - 6 hours of usage on a single charge
- Water based sealers only
**Make Older Pavers Look Like New!**

Surebond Wet Look Sealers provide visual improvement to the hardscape installation by intensifying the color of the surface and/or by adding a sheen. They are an ideal choice for enhancing a new surface or to make an older, tired-looking hardscape surface look like new again. Surebond Wet Look Sealers provide protection against the harsh elements, UV rays and every day wear and tear as well as minimize maintenance by making it easier to clean.

**SB-6000 Wet Look Sealer**
- Deeply Enhances Surface Tone with Satin Finish
- Spray & Back Roll Application: Apply a Second Coat After First Coat Has Dried
- Depending on Environmental Conditions, a Light Reapplication May Be Required Every 6 Months to 2 Years to Maintain Desired Effect
- Low VOC, Water Based Sealer

**SB-6400 Wet Look Penetrating Sealer**
- Deeply Enhances Surface Tone with Matte Finish
- Durable & Long Lasting Chemically Bonded Protection
- Ideal for Natural Stone
- Spray & Back Roll Application: Apply Two Coats Wet on Wet
- Low VOC, Water Based Sealer

**SB-8700 Wet Look Joint Stabilizing Sealer**
- 3 in 1 Product: Seals, Enhances & Stabilizes Joint Sand
- Deeply Enhances Surface Tone with Semi-Gloss Finish
- "Rain Safe" within 90 Minutes
- Antifungal Protects Sealer Film from Mold, Moss & Algae
- Flood Coat Application
- Solvent Based Sealer

**SB-9000 Wet Look Sealer**
- Deeply Enhances Surface Tone with Gloss Finish
- Spray & Back Roll Application: Apply a Second Coat After First Coat Has Dried
- Solvent Based Sealer

---

**Invisible Penetrating and Special Use Sealers**

**SB-3330 Protect-A-Wall**
- Designed for Retaining Walls & Other Vertical Masonry Surfaces
- Moderately Enhances Surface Tone with Semi-Gloss Finish
- Provides Water, Salt, Stain & UV Protection
- Spray & Back Roll Application
- Low VOC Formula, Water Based Sealer

**SB-4400 Perma-Seal®**
- Transparent Finish
- High Performance Silane/Siloxane Blend
- Repels Water & Protects Surfaces from Salt Attack
- Sprayer, Roller, Sponge or Pad Application: Apply Two Coats Wet on Wet
- Solvent Based Sealer

**SB-4000 Water Repellent & Salt Blocker**
- Transparent Finish
- High Performance Silane/Siloxane Blend
- Repels Water & Protects Surfaces from Salt Attack
- Sprayer, Roller, Sponge or Pad Application: Apply Two Coats Wet on Wet
- Low VOC Formula, Water Based Sealer

**SB-5000 Stain Blocking Sealer**
- Transparent Finish
- Blocks Oil, Water & Organic Staining
- Durable & Long Lasting Protection
- Ideal for Driveways & Patios
- Sprayer, Roller, Sponge or Pad Application
- Apply Two Coats on Areas with High Exposure to Staining or New or Porous Areas
- Low VOC Formula, Water Based Sealer

Paver, natural stone and concrete hardscapes are a BIG investment that can provide years of beauty and enjoyment if well maintained. This required routine maintenance is made SIMPLE and EASY with SEK-Surebond’s Hardscape Restoration & Maintenance System.

Once the hardscape installation is complete, now is the ideal time to seal the surface and start following the appropriate maintenance schedule to protect your investment so that it achieves maximum performance and remains beautiful today and through the years. However, it is never too late to restore and protect your investment. Even if you have an older hardscape surface, just follow SEK-Surebond’s step-by-step Hardscape Restoration & Maintenance System to make your investment look like new again.

**Multi Use Cleaner**

**SureClean**
Deep Penetrating Multi-Use Cleaner
- Powerful Cleaner for Routine Maintenance & Restoration
- Removes Embedded Soil & Tire Scuffing
- Prepares Unsealed Surfaces for Sealing
- Super Concentrated Formula

**Sealer Stripper**

**SureStrip**
Fast Acting Sealer Stripper
- Removes a Variety of Sealers & Coatings
- Spot Cleaner for Removing Paint Spots
- Fast Acting – Works in Minutes
- Ready to Use Formula

**Specialty Cleaners**

**S.R.B. Stain & Rust Buster**
- Effective on Common Stains: Non-Greasy Foods, Beverage Spills, Leaves, Moss & More
- Removes Rust Stains
- Fast Acting – Works in Minutes
- Concentrated Formula

**Oil Extractor**
Oil Stain Cleaner
- Effective on Petroleum-Based Grease & Oil Stains
- Removes Food-Based Grease & Oil Stains
- Encapsulates Oil – Easy to Rinse
- Fast Acting, Ready to Use Formula

**Efflo Off**
Efflorescence, Mineral & Salt Deposit Cleaner
- Removes Stubborn Efflorescence
- Heavy Duty Surface Cleaner
- Prepares Unsealed Surfaces for Sealing
- Concentrated Formula

# Interlocking Concrete Pavers

- Clay Pavers
- Natural Stone
- Concrete Masonry
- Concrete Stucco
- Retaining Walls
- Exposed Aggregate

## Product Selection Chart

### Purpose:

- Interlocking Sealing
- Joint Stabilizing Sealing

### Ideal For:

- Interlocking Concrete Pavers
- Clay Pavers
- Natural Stone
- Concrete Masonry
- Concrete Stucco
- Retaining Walls
- Exposed Aggregate

*Indicates water-based products

**Important!** Before using any Surebond product, test on the substrate following the directions on the container and technical data sheet. Evaluate before continuing. Substrates such as clay pavers, natural stone and decorative concrete products have a lot of variability and care must be taken to insure the integrity of the finished product.

Use this chart for product selection, then refer to the technical data sheet on [www.sek.us.com](http://www.sek.us.com) for further product details and surface suitability before making your final selection.
PROPER JOINT SAND INSTALLATION FOR USE WITH JOINT STABILIZING SEALERS

For optimal joint stabilization, the paver joints should be filled with dry, correctly graded jointing sand that meets the ASTM C144 standard. The top level of the sand should not exceed the bottom of the chamfer or 1/8” below the surface on non-beveled or tumbled paver surfaces. Compaction is recommended after sweeping sand into joints to minimize voids in sand joints. Use a vibratory compactor for concrete pavers and a rubber hammer and piece of wood (2”x 4”) for natural stone to seat the joint sand into the setting bed. A leaf blower is recommended to remove dust, debris and fine sand particles from the surface before applying sealer.

METHODS OF SEALER APPLICATION

FLOOD COAT & SQUEEGEE
Application method to be used with Joint Stabilizing Sealers. Step 1: Flood coat sealer on surface with a low-pressure sprayer. Step 2: With a squeegee, direct excess sealer on the surface into the joints to simultaneously bond joint sand and seal the surface.

SPRAY & BACK-ROLL
Application method to be used with Wet Look Sealers, Special Use and Invisible Penetrating Sealers. Step 1: Spray sealer on surface with a low-pressure sprayer. Step 2: With a foam roller, back-roll to remove excess sealer from the surface.
