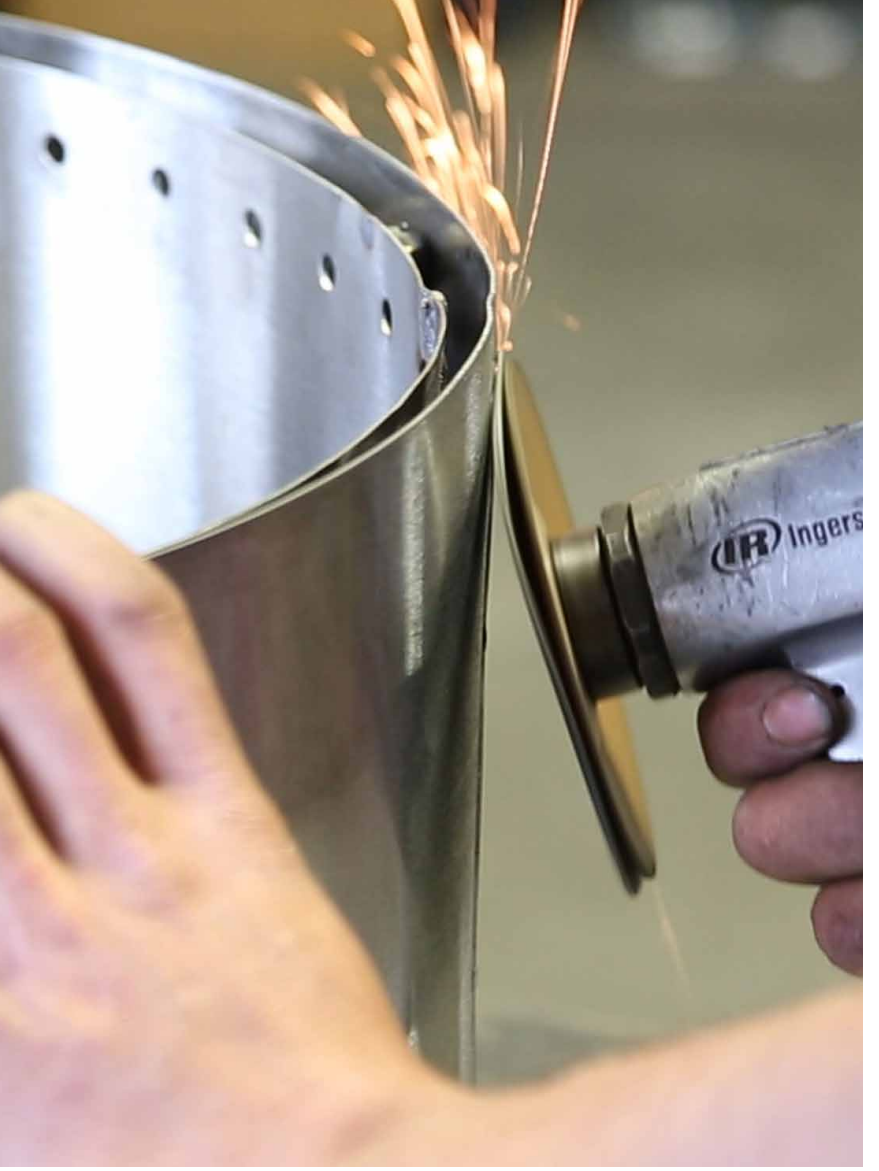
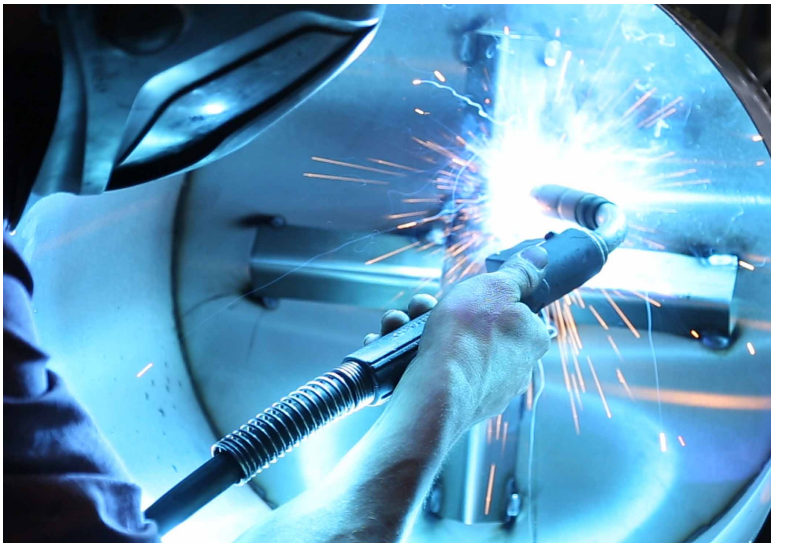
SMOKE LESS FIRE PITS

breeo

rethinking fire





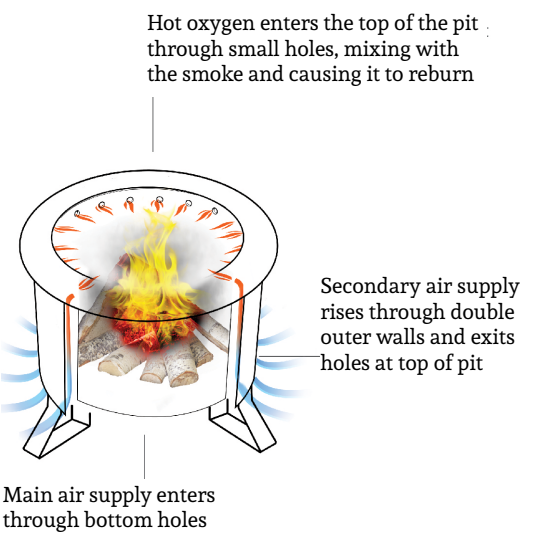
About us

The very early prototype of the smoke less campfire was developed by an Amish gentleman in Holmes County, Ohio in 2011. The team at Breeo continues to support that heritage of work ethic, living simply, and caring about the little things in life. We have taken the original smoke less idea and applied it to multiple styles of fire pits, manufacturing each of them in our own shop in Lancaster, Pennsylvania.

Breeo has a goal of reviving the campfire culture in North America. Over the last decade or two, gas logs and other alternatives have gained in popularity due to their convenience, but we here at Breeo feel that nothing can replace the ambiance and warmth of a real wood fire. Everyone on our team can remember fond campfire memories with family and friends, roasting hotdogs, singing campfire songs, and talking late into the night, and our desire is to share all of that with our customers.

Check us out on Facebook and Instagram @breeollc

How It Works:



ablaze
fire it up.

The original Breeo Smoke Less Fire Pit, the Ablaze is the fierce 'papa bear' of our fire pits. A stand-alone unit, this heavy duty steel fire pit was designed for those who prefer life in the rugged outdoors. Attach any of the accessories available for the Ablaze and you'll never have to cook inside again!

In 2014, the Ablaze won the Best-In-Category and Best-in-Show at the Vesta Awards by Hearth and Home Magazine, two of the most prestigious industry awards available for fire pits and outdoor hearth products.

As with our other stand-alone fire pits, the Ablaze comes fully assembled and ready to go – simply lift your unit out of the box, and start your fire!

Cooking over the Ablaze is an experience unlike any other outdoor cooking unit, as the same secondary combustion technology used to reduce smoke also creates a hotter and more even cooking surface. This allows your cuisine to cook more quickly, all the while acquiring that oh-so-delicious, campfire flavor.

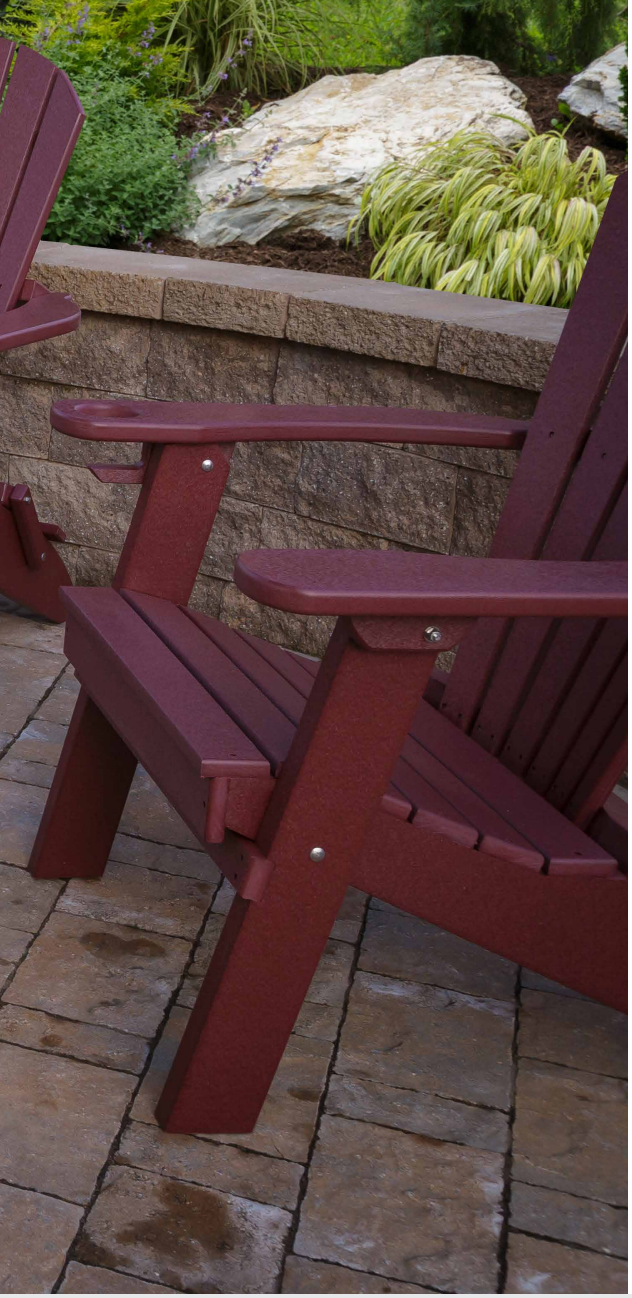
The Swing Away Grill attachment is available for all your typical cookout meal desires, as well as the Griddle, Chicken Rotisserie Grill, and Kettle Winch, paired with a Breeo Cast Iron Kettle. Outdoor cooking has never been so easy or so fun!

See last page for cooking accessories and product specifications.

Patented Design

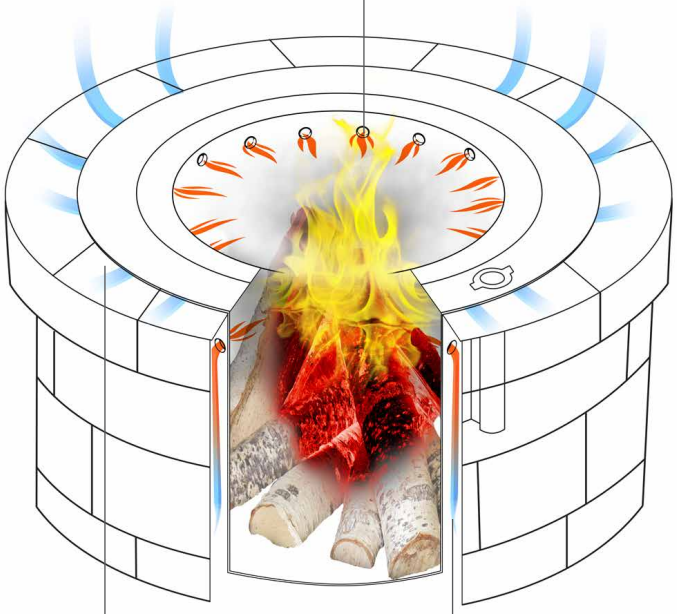
gather round.

The Zentro unit is designed to be an insert, ready to drop into your new or existing paver, block, or stone fire pit. The secondary combustion that makes this insert stand out from all the rest provides a hotter, more even cooking surface, allowing your outdoor cuisine to cook more evenly and more quickly, while still acquiring that irresistable campfire flavor. A more even cooking surface means no more constant rotation of your steaks or pork chops, allowing your meat to stay juicy and tender. Consider making more than just dinner over your fire with the Zentro Griddle accessory – eggs, bacon, and pancakes have never tasted so good! Chicken grilled in the Chicken Rotisserie Grill comes out of the fire tasting juicier and more flavorful than ever. Or, try your hand at making soups and stews using the Zentro Kettle Winch accessory and one of our Breeo Cast Iron Kettles!



zentro
gather round.

Hot oxygen enters the top of the pit through small holes, mixing with the smoke and causing it to reburn



Main air supply enters between the stone and metal ring

Secondary air supply rises through double outer walls and exits holes at top of pit

Designed as an insert for stone, paver, or block fire rings, the Zentro comes in three different sizes, two different shapes, and two different finishes to fit your outdoor space dreams. Simply unbox your unit, lift it into your stone, paver, or block fire ring, light your fire, and enjoy!

19”STAINLESS

24”STAINLESS

24”STEEL

The Double Flame Fire Pit is created to be a lighter-weight, but still heavy-duty, fire pit that will last for a lifetime of use in the great outdoors. Both the 19” and 24” sizes weigh in at less than 65 pounds, which allows for portability to and from your campsite, beachfront, or backyard! Each unit comes completely assembled and ready to pack in with the rest of your camping supplies.

Here at Breeo, we are firm believers that food cooked over an open fire is simply better tasting food. The same technology used to create the smoke reduction also allows for a more evenly distributed heat over the grill surface. Steaks, pork chops, sausages, and hamburgers have never been so much fun to grill!

Do you like the look of a stone fire pit but would also like the option to take your fire pit with you on your next adventure? Try building a stone, paver, or block fire ring around your Double Flame fire pit! This way, you can still enjoy the beauty of a permanent feature in your backyard but have the freedom to lift it out and take it with you wherever you roam.

See last page for cooking accessories and product specifications.

Take your outdoor patio to a new level of sophistication with the Luxeve Smoke Less Fire Pit. A powder-coated exterior, modern stainless steel feet, and fire pit glass around the rim give the Luxeve contrast and style. Add in the smoke reducing technology that sets the Luxeve apart and you have a wood-burning fire pit that can compete with the quality and aesthetic standards of the higher end outdoor living market. Available in five different powder-coated colors or a simple stainless steel finish, and manufactured entirely out of stainless steel, the Luxeve combines clean-burning technology with a modern, contemporary design. Each Luxeve Fire Pit comes with your choice of five different colors of decorative fire pit glass to be inserted in the outer ring of the fire pit.

The Luxeve is an excellent choice for those looking for an innovative and modern way to enjoy the age-old campfire. Less smoke means more fun so pull up a chair and relish the beauty of a wood-burning fire without the annoyance of large amounts of smoke chasing you around your fire pit.
